Alyssa Davis

graphicDesigner // webDeveloper

Hi!

I am a solid front-end **Web Developer** with a B.F.A. in **Graphic Design**. I dive head-first into the latest technology, using curiosity and experimentation to create unique opportunities. I am addicted to responsive web design, using tools and frameworks for quick implementation. I am getting my hands dirty with OOP and **Motion Graphics** while juggling marathon creative sessions with my free-spirited alter-ego.

You should hire me but only if you can keep up!
